

## Car Map Light

This flexible car map or reading light provides white or blue light options with a 3 level dimmer. The MPL12D was designed for security and military vehicles, as a spot reading light with a flexible adjustable arm.

A specific current driver is integrated to provide a nominal power and a uniform light in case of supply voltage variation. The lamp head is made from aluminum with strong anodize coating.

## Specifications

Light Flux: White: up to 57 lm, 3 levels dimming, Blue: 4 lm, Red: 35 lm (optional).

Approx. Light Angle: 120°
